Santhosh Gurujupalli

AWS DevOps Engineer

Hyderabad • **9640918429** • santhoshg3396@gmail.com • https://www.linkedin.com/in/santhosh-gurujupalli-a724293b0/

SUMMARY

- DevOps Engineer with 3+ years of experience designing and managing scalable, highly available cloud infrastructure on AWS. Strong expertise in Kubernetes (EKS), Terraform, CI/CD automation, and containerized microservices. Proven track record of reducing deployment time, improving system reliability (99.9% uptime), and automating infrastructure provisioning using Infrastructure as Code. Experienced in GitOps (ArgoCD), monitoring (Prometheus, Grafana), and production troubleshooting across distributed systems.

WORK EXPERIENCE

Vzure Software Network Solutions, Bengaluru **December 2022 – Present**

DevOps Engineer

- Designed and managed AWS EKS clusters running 80–150+ pods across multiple environments, ensuring high availability and scalability for microservices-based applications.
- Built and optimized CI/CD pipelines using Jenkins and AWS CodePipeline, reducing deployment time by ~60% and enabling faster, reliable releases.
- Automated infrastructure provisioning using Terraform (modular approach), reducing manual effort by 70% and ensuring consistent environments across dev, staging, and production.
- Implemented GitOps workflows using ArgoCD for automated Kubernetes deployments, improving release consistency and rollback capabilities.
- Containerized applications using Docker and deployed to Kubernetes, managing deployments, services, autoscaling, and resource optimization.
- Designed secure AWS VPC architecture (public/private subnets, NAT Gateway, IGW, route tables, security groups) ensuring network isolation and fault tolerance.
- Implemented monitoring and alerting using Prometheus, Grafana, and AWS CloudWatch, reducing incident response time by 40%.
- Troubleshot production issues (CrashLoopBackOff, resource limits, misconfigurations), ensuring minimal downtime and maintaining 99.9% uptime.
- Collaborated with development teams to improve deployment strategies, system performance, and application reliability.

PROJECTS:

Infrastructure Automation using Terraform on AWS

Technologies: Terraform, AWS, Jenkins, Ansible

- Designed reusable Terraform modules to provision AWS resources including VPC, EC2, RDS, S3, IAM, and Auto Scaling.
- Implemented remote backend using S3 and DynamoDB for state management and locking to support team collaboration.
- Automated infrastructure provisioning through Jenkins pipelines, enabling faster and consistent environment setup.
- Used Ansible for configuration management and application deployment, reducing manual setup efforts.

CI/CD Pipeline Implementation for Microservices

Technologies: Jenkins, Docker, Kubernetes, GitHub, SonarQube

- Designed end-to-end CI/CD pipeline for microservices architecture, automating build, test, and deployment workflows.
- Integrated SonarQube for static code analysis, improving code quality and reducing vulnerabilities.
- Built Docker images and pushed to container registry, enabling consistent and portable deployments.
- Deployed applications to Kubernetes using Helm charts, supporting version control and rollback strategies.
- Implemented automated deployment strategies ensuring zero/minimal downtime releases.

EDUCATION

Satya Institute of Technology and Management, Vizianagaram, Andhra Pradesh, India 2017-2020
Civil Engineering – B.E

SKILLS

- **Cloud Platforms:** AWS (EC2, S3, VPC, IAM, EKS, ECS, Auto Scaling, ALB, NLB, Route53, CloudWatch) Azure (VMs, Functions, Storage, Networking)
- **Configuration Management & IaC:** Terraform, Ansible
- **CI/CD & Version Control:** Jenkins, GitHub Actions, GitLab CI/CD, Git
- **Containerization & Orchestration:** Docker, Kubernetes, Helm
- **Monitoring & Logging:** Prometheus, Grafana, CloudWatch, ELK Stack (Elasticsearch, Logstash, Kibana)
- **Databases**: MongoDB
- **Automation & Scripting**: Linux, Bash, PowerShell, Python, Shell Scripting
- **Build Tools & Security**: Maven, SonarQube
- **Collaboration Tools**: Jira, Slack

SOFT SKILLS

- Effective Communication | Problem - Solving | Team Player | Analytical thinking.
